```

Features

Reading Experience

- Clean, distraction-free interface
- Customizable font size (16-24px)
- Adjustable line spacing (1.4-2.2)
- Three reading themes: Dark, Sepia, Light

- First-letter drop caps
- Reading progress indicator

Audio Integration

- Professional audio narration
- Integrated audio player with controls
- Play/pause functionality
- Seek bar for navigation
- Time display

Navigation

- Chapter navigation (previous/next)
- Chapter list modal for quick access
- Keyboard shortcuts:
 - ← Previous chapter
 - → Next chapter
 - **Space** Play/pause audio
 - **Esc** Close modals

Progress Tracking

- Automatic progress saving
- Resume where you left off
- Visual progress bar

Available Stories

The Scarlet Honey (25 Chapters)

A tale of mystery and intrigue featuring the Skeem family and their encounters with Ida Mbona. Chapters 1-7 have audio narration.

Nelly's Story (22 Chapters)

An epic adventure through a transformed world. Chapters 1-9 have audio narration.

Customization

Color Scheme

Edit CSS variables in `css/styles.css`:

```
:root {  
  --color-black: #0A0A0A;  
  --color-white: #FAFAFA;  
  --color-accent: #D4AF37; /* Gold accent */  
  --color-gray-light: #E5E5E5;  
  --color-gray-mid: #A0A0A0;
```

```
--color-gray-dark: #1A1A1A;  
}
```

Adding New Stories

1. **Add story HTML files** to `stories/` folder
2. **Add audio files** to `audio/` folder
3. **Update `js/reader-script.js`:**

```
const storyData = {  
  'your-story-slug': {  
    title: 'Your Story Title',  
    totalChapters: 20,  
    chapters: generateChapterTitles('Your Story', 20),  
    htmlFiles: {  
      1: 'your-chapter-1.html',  
      2: 'your-chapter-2.html',  
      // ... map all chapters  
    },  
    audioFiles: {  
      1: 'your-audio-1.mp3',  
      2: 'your-audio-2.mp3',  
      // ... map available audio  
    }  
  }  
};
```

4. **Add story card to `index.html`** (see existing cards as template)

Technical Details

Technologies

- Pure HTML5
- CSS3 (Grid, Flexbox, Custom Properties)
- Vanilla JavaScript (ES6+)
- Google Fonts (Playfair Display, Crimson Pro)
- LocalStorage for persistence

Browser Support

- Chrome
- Firefox
- Safari
- Edge
- Modern mobile browsers

Troubleshooting

Audio Not Playing

- Ensure you're using a local server (not file://)
- Check browser console for errors
- Verify audio files exist in `audio/` folder
- Some browsers require user interaction before audio plays

Chapters Not Loading

- Verify HTML files exist in `stories/` folder
- Check filename spelling matches `storyData` in `reader-script.js`
- Use browser developer tools to check for 404 errors

Images Not Showing

- Ensure images are in `images/` folder
- Check file names match exactly (case-sensitive)
- Verify image formats (.jpeg, .jpg)

Mobile Optimization

- Touch-friendly navigation
- Responsive breakpoints (768px, 480px)
- Optimized font sizes for mobile
- Streamlined audio controls on small screens

Known Limitations

1. **Audio availability:** Not all chapters have audio files
2. **Offline mode:** Requires local server or web hosting
3. **Cloud sync:** Progress only saved locally

Deployment

GitHub Pages

1. Push to GitHub repository
2. Enable GitHub Pages in repository settings
3. Set source to main branch

Netlify/Vercel

1. Connect repository
2. Deploy (no build step needed)
3. Your site is live!

Traditional Web Hosting

1. Upload all files via FTP
2. Maintain directory structure
3. Ensure all file permissions are correct

License

Open source - Free for personal and commercial use

Tips for Best Experience

1. **Use a local server** - Avoids CORS issues
2. **Enable audio** - Best experienced with narration
3. **Try different themes** - Find your comfort zone
4. **Use keyboard shortcuts** - Faster navigation
5. **Bookmark chapters** - Save your progress
